PERGAMON GROUP'S INNOVATIVE SYSTEM FOR PETROL STATIONS

Pergamon GROUP has created a cutting-edge system tailored for petrol stations. This system is designed to access eTIMS and streamline tax invoicing, while also offering automation, control, and monitoring capabilities.

Key Features:

- Supports simultaneous operation for up to 50 tanks, 50 dispensers, and 5 price boards.
- Compatible with over 50 brands of Automatic Tank Gauge (ATG) systems and probes, along with more than 145 brands of petroleum, LPG (liquefied petroleum gas), and CNG (compressed natural gas) dispensers.
- ATGs provide electronic monitoring of fuel tanks, delivering real-time data such as level and volume.

Additionally, records of pump sales, tank measurements, and in-tank deliveries are stored, and comprehensive reports are generated. The system also features automatic connectivity to a cloud server for data uploads and remote control capabilities.
